PROFESSIONAL EXPERIENCE

QA Engineer and Assistant Project Manager

August 2025 – June 2026

Global Tech Services Solution (GTSS) – Toronto, ON / Remote

- Directed comprehensive manual and automated testing lifecycles for new feature launches, designing rigorous test cases and executing regression testing to guarantee product stability.
- Partnered with the Project Manager to orchestrate cross-functional team workflows, tracking deliverables, scheduling timelines, and maintaining crucial project documentation.
- Spearheaded improvements to QA workflows and project tracking tools, identifying early-stage defects and tracking bugs to accelerate developer resolution.
- Facilitated seamless communication between engineering and stakeholder teams, managing risk registers, status reports, and administrative metrics to drive operational efficiency.

Data Science Intern

May 2024 – August 2024

Novisto – Montreal, QC

- Developed and refined machine learning models for ESG data analysis as part of a six-member data science team.
- Built data pipelines to automate ingestion and transformation, reducing processing time by 30%.
- Conducted exploratory data analysis (EDA) and statistical modeling to extract meaningful insights from large datasets.
- Maintained Python-based scripts for data cleaning, validation, and anomaly detection.
- Collaborated with software engineers and product managers to integrate ML solutions into Novisto's ESG analytics platform.

Junior Technician

April 2023 – July 2023

Unitech Solutions – Toronto, ON

- Executed large-scale IT relocations for corporate clients including CBRE, Canada Goose, and Cassels.
- Configured and deployed workstations and monitors, enhancing office layout efficiency and productivity.
